

Founder and Director of Pediatric and Dental Anesthesia Associates, Dr. Alikhani is a Board Certified Physician Anesthesiologist who is fellowship trained in Pediatric Anesthesia.

After earning a degree in Biological Sciences from the University of California, Irvine, Dr. Alikhani completed his medical education at The University of Chicago, Pritzker School of Medicine, consistently rated as one of the top ten medical schools in the country.

Dr. Alikhani continued with his anesthesia residency at Massachusetts General Hospital and Harvard Medical School, where he also served as Chief Resident and as a clinical faculty member. His post graduate training includes a fellowship in Pediatric Anesthesia at Children's Hospital in Boston, the top rated pediatric teaching facility of Harvard Medical School.

Dr. Alikhani has conducted extensive primary research and has appeared in more than twenty scientific publications. In addition, he has had multiple presentations at national meetings, and he enjoys teaching new techniques to practicing anesthesiologists.

He has devoted more than 10 years to the care of children at a Pediatric Trauma Center. Dr. Alikhani lives in Orange County with his wife and two children, ages 8 and 10. He combines his knowledge and background in Pediatric Anesthesia to provide the safest sedation possible in the dental office.

**PEDIATRIC & DENTAL**  
ANESTHESIA ASSOCIATES

Bringing hospital quality  
anesthesia to your office.

The safest solution for  
**Adult and Pediatric  
Dental Anesthesia**

**Shar Alikhani, M.D.**

Board Certified by  
**the American Board of  
Anesthesiology (ABA)**  
Fellowship Trained in  
Pediatric Anesthesia

Welcome to **Pediatric and Dental Anesthesia Associates**, the safest solution for Pediatric Dental Anesthesia. We provide state of the art, hospital quality anesthesia and monitoring services. Our equipment is ultra-compact and mobile, and it can be used in any office setting. We provide an anesthesia machine with oxygen and nitrous tanks, computer controlled propofol infusion pumps, and safeguard measures you would find in any surgery center or hospital. We also provide safe and affordable dental general anesthesia or intravenous sedation for your patients, along with all the medications and supplies needed to provide a hospital grade anesthetic. Your office will become a fully functional surgery center setting, complete with emergency equipment, including a defibrillator and crash cart.

- ❖ Transform your office into a hospital quality surgery center setting
- ❖ Treat any patient in your office
- ❖ Mobile anesthesia for dental offices
- ❖ Board Certified by the American Board of Anesthesiology (ABA)
- ❖ Fellowship trained in Pediatric Anesthesia
- ❖ Certified in:
  - Advanced Cardiac Life Support (ACLS) and Pediatric Advanced Life Support (PALS)
- ❖ Dental Board of California General Anesthesia Permit
- ❖ No increase in your malpractice premium for using our services
- ❖ We carry \$1M/\$3M malpractice coverage, which meets or exceeds community standards

## PEDIATRIC & DENTAL ANESTHESIA ASSOCIATES

The SAFest solution for  
**Adult and Pediatric Dental Anesthesia**

**S**AFE AND SECURE ANESTHESIA

**A**BOVE THE STANDARD OF CARE

**F**OUNDATION OF EXCELLENCE IN PEDIATRICS

**E**NTRUSTED WITH THE CARE OF YOUR CHILD

All anesthetics are provided by Dr. Shar Alikhani, a Harvard trained Pediatric Physician Anesthesiologist with more than 10 years experience at Children's Hospitals and Trauma Centers. The doctor's care begins in the preoperative phase. Children fall asleep in the comfort of their parent's arms in a child-friendly, gentle and safe setting.

Dr. Alikhani will continuously monitor the patient throughout the procedure, and during the recovery phase. If desired, parents may accompany their child throughout the procedure. All patients will be awake and ambulating prior to discharge from your office.

Dr. Alikhani combines his knowledge and background with extensive experience in Pediatric Anesthesia to provide the safest sedation possible in the dental office.

**DR. ALIKHANI HAS BEEN VOTED ONE OF  
ORANGE COUNTY'S TOP PHYSICIANS TWO  
YEARS IN A ROW BY THE ORANGE COUNTY  
MEDICAL ASSOCIATION.**

## What is Hospital Grade Anesthesia?

- ❖ State of the art anesthesia monitoring and equipment
- ❖ Same safeguard measures as those found in hospitals and surgery centers
- ❖ Choice of anesthesia - minimal sedation, deep sedation or general anesthesia
- ❖ Minimal risk of laryngospasm and aspiration
- ❖ A child-friendly environment where parental involvement is encouraged
- ❖ Ability to routinely and easily secure the airway
- ❖ The SAFest way to perform any oral or facial procedure

Our techniques provide you with unlimited access to the mouth while performing your procedure, including obtaining x-rays and bite impressions. You can work uninterrupted as long as you wish. There is never any problem with airway obstruction or any need to do a "jaw thrust" or "chin lift" intervention to clear the patient's airway.

We make the process as easy as possible, providing brochures and consents in multiple languages. Every patient receives a telephone consultation and evaluation by Dr. Alikhani prior to the procedure, and patients with a complicated history will be examined beforehand. We have extensive expertise in assessing coexisting diseases, and we will resolve all issues in advance of the procedure.

Our routine monitoring exceeds the recommendation of the American Society of Anesthesiologists (ASA). This leads to early detection of any problems, improved preventive care, and increased safety for your patients.

Our use of a balanced anesthesia technique leads to a faster recovery. All patients will be fully awake and recovered prior to discharge.
